China is an optimal country for electric aviation:

- ✓ Rising awareness of environmental issues in the society;
- ✓ The government's ambitious development plan for the general aviation which is also called low-altitude economy in China;
- ✓ Electric airplanes suit China's GA operation needs very well;
- ✓ China is the leading country in e-mobility and the supply chains at large as the world's largest electric vehicle market since 2015 as well as the world's largest manufacturer of batteries and many other products in the supply chain of e-mobility.

e-flight-forum in China: Ready for Takeoff 2017 Beijing

The first e-flight-forum held in Beijing in November 2017 invited over 40 prominent presenters from around the world, had several world premiere projects and attracted over 300 audience.
